Pictorial Survey of the Bible

The Survey consists of a 20 page chart which needs to be assembled. This makes a long pictorial map that allows you to view the central message of the Bible from Genesis to Revelation. The chart converts the 66 books of the Bible into one book.

The Survey also consists of 8 lessons which is the commentary to go with the chart. The first lesson is an overview which shows you the chronology of God's promises to fallen man and how it was fulfilled in Jesus Christ. It follows with 7 other lessons which amplifies the events in the chart.

The way you assemble the chart is to take the heavy oversize paper marked "A" and join it at the line with the sheet marked "B". Use Scotch Magic transparent tape or some other transparent tape. It is helpful if before you tape the sheets you fold them in half with the picture side out. The pages join at the edge and do not overlap. Some students color their charts which makes it much more attractive. The path from the promise to the Cross color red, from the tomb forward color with yellow or gold. It is suggested that you tape the pages on the backside, especially if you plan to color the pictures. Once all the sheets are taped, accordion them into the book.

Genesis and Creation
(First folded page)

Tape blank edges this side.

Fold picture this side.
